Gateway Energy Partners with Leukemia & Lymphoma Society

NYACK, N.Y. – For the seventh year, Gateway Energy Services Corporation will partner with the Leukemia & Lymphoma Society to fight cancer. This year, Gateway is a Silver Sponsor of The Light The Night Walk on Sunday, October 24, at Nyack Memorial Park.

Gateway Energy employees, friends and families hope to raise awareness and inspire other local businesses to join the fight and help thousands of people battling cancer. Anyone who would like to join the 1-mile walk can register at 4 p.m. that day. Opening ceremonies begin at 5:30 p.m., with the walk at 6. Performances and fireworks follow at 6:30.

“We believe in supporting organizations in our local communities,” said Steve Maslak, President and CEO of Gateway Energy Services. “We take our social responsibility very seriously. For seven years, we have worked with the Leukemia & Lymphoma Society to seek a cure through fundraising and education.”

Gateway Energy’s philanthropy also includes raising thousands of dollars since 2008 for the American Heart Association, which has bestowed Fit-Friendly Company Gold Status. This year, Gateway has added the National Multiple Sclerosis Society, raising thousands for and attending the Central Pennsylvania Chapter’s walk in Wilkes-Barre, Pa., in support of an employee who was diagnosed with MS earlier this year. Gateway has a satellite office in nearby Forty Fort, Pa. The company has also provided in-kind services and supported volunteerism among its employees, who have devoted time and expertise to many local organizations.

About Gateway Energy Services

Gateway Energy Services Corporation, based in Rockland County, N.Y., is one of the largest independent retail energy suppliers in North America, providing natural gas and electricity to residential and business customers in more than 35 markets across eight states, the District of Columbia and Ontario, Canada. Founded in 1997, Gateway Energy provides competitive energy products to consumers giving them more control over their energy costs.
